Professional Summary

Current student at Johns Hopkins University with a deep appreciation and passion for the studies and subjects that I love. Charismatic, dedicated, with an insanely high aptitude for learning.

Skills

- Wide interests in many fields of study from Computer Science to Mathematics
- Programming and general computer knowledge from Python, Microsoft Suites, C/C++, and Linux environments
- A deep attention to detail
- Profound communication skills as being a representative
- Dedication and honesty towards coworkers and employers
- Adaptive learner

Work History

Fulfillment Associate, 08/2017 to Current

Amazon – Baltimore, MD

Confidently packed customer's orders to satisfaction. Was versatile in the warehouse setting due to the multiple different training sessions my manager offered to me.

Tournament Scheduler for National History Bee, 04/2017 to 05/2017

Academic Competition Enterprises – Spartanburg, SC

I was contracted to build the entire field schedule for the National History Bee and Bowl for 2017. For the task, I effortlessly used Python to write a program that would generate the schedules. My duties during the during also included problem management and being a representative for History Bee and Bowl while communicating with concerned parents.

Lab Assistant, 11/2015 to 04/2016

The Johns Hopkins Hospital – Baltimore, MD

I was a student hire at the Genetics Resource Core Facility where I, first, started as a clerical assistant for packages and deliveries to the lab. However, I was quickly integrated further into the lab to the point where I was preparing and executing PCR reactions necessary to the function of the lab.

Education

Bachelor of Science: Mathematics, TBD

Johns Hopkins University - MD

I am on a hiatus from my studies at Johns Hopkins. My particular interests included Ring Theory and Real Analysis.

High School Diploma: 2014

Dorman High School - Roebuck, SC
